SUMMARY

Full Stack Developer with 1+ years of experience designing, building, and deploying scalable AI-powered SaaS applications. Proficient in React, Next.js, Node.js, PostgreSQL, and LLM integration, with production applications serving 1,000+ users.

SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python
Frontend:	React.js, Next.js, Tailwind CSS, HTML5, CSS3, Jest, React Testing Library
Backend:	Node.js, Express.js, RESTful APIs, WebSockets, JWT Authentication
Databases:	PostgreSQL, MongoDB, MySQL
DevOps & Tools:	Git, GitHub, GitHub Actions, Vercel, Docker, Postman, Figma, Agile/Scrum
AI Integration:	Groq API, OpenAI API, Gemini API, LangChain

WORK EXPERIENCE

Placentek

Jun 2025 – May 2026

Full Stack Developer

- Built a production-ready RAG-based AI shopping assistant (Next.js, OpenAI, Redis) for a WooCommerce store, grounding LLM responses in live product/inventory data to eliminate hallucinated pricing and fitment info.
- Implemented secure JWT authentication and optimized PostgreSQL queries through indexing, reducing average API response times by approximately 35%.
- Developed a reusable React and Tailwind CSS component library, improving Lighthouse performance by 20 points, reducing frontend load times by 12%, and increasing UI consistency across the application.

PROJECT WORK

CodePulse | React, TypeScript, Node.js, Express.js, PostgreSQL, Groq AI

[Live](#) [GitHub](#)

AI-powered GitHub App that reviews pull requests, detects code quality and security issues, posts inline fixes, tracks recurring mistake patterns, and sends developers weekly personalized learning digests.

- Built a multi-tenant webhook server with HMAC-SHA256 verification, parsing unified diff format to post AI-generated inline comments pinned to exact lines via the GitHub REST API – reviewing PRs in ~2 seconds.
- Engineered a two-pass Groq AI pipeline (file prioritization → deep review) returning typed JSON per issue (file, line, category, severity) with zero free-text parsing.
- Designed a per-developer pattern tracking system in PostgreSQL surfacing recurring mistakes across PR history, triggering automated weekly digest emails via Resend and GitHub Actions.
- Built a React analytics dashboard with GitHub OAuth, App installation flow, and repository management – currently used across 300+ repositories, with 100+ PRs reviewed to date.

ShortlistAI | React, TypeScript, Supabase, Groq AI, Tailwind CSS

[Live](#) [GitHub](#)

AI-powered tool that analyzes resumes against job descriptions, rewrites ATS-optimized bullets, identifies skill gaps, and generates personalized prep roadmaps – used by 1000+ job seekers.

- Built a multi-output AI analysis pipeline using Groq structured tool-calling, producing fit score (0–100), ATS before/after scoring, keyword gap detection, and optimized bullet rewrites in a single pass.
- Developed a time-aware prep roadmap engine generating timeline-adjusted study plans (1 week to 6+ months) with role-specific behavioral and technical interview questions based on detected skill gaps.
- Architected a full-stack SaaS with PDF extraction pipeline, persistent analysis history dashboard, and JWT-secured access – scaled to 1000+ users.

EDUCATION

COMSATS University Islamabad

2023 – 2027

Bachelor of Computer Science – GPA: 3.41

RESEARCH

AI-Based Software Vulnerability Detection Research

[GitHub](#)

Conducted empirical research evaluating the robustness and explainability of AI-based software vulnerability detection.

AI-Based IoT Network Intrusion Detection

[GitHub](#)

Conducted comparative research on deep learning architectures for IoT network intrusion detection, evaluating performance, efficiency, and edge deployment.

CERTIFICATIONS

- Machine Learning Specialization** – DeepLearning.AI
- Google UX Design Professional Certificate** – Google
- AWS Cloud Practitioner** – Amazon Web Services
